

API Options Fields

Some of the fields that you can update or fetch, may have a type field option.

For example, license type may have the following values:

"Evaluation", "Not For Resale" and "Production"

There is an option to get all available values for a type field using the API call OPTIONS:

Request Example

```
http -a <admin_email>:<admin_password> OPTIONS https://<host>/api/licenses/
```

Response Example

```
{
  "actions": {
    "POST": {
      ...
    }
  },
  "product_type": {
    "choices": [
      {
        "display_name": "Evaluation",
        "value": 1
      },
      {
        "display_name": "Not For Resale",
        "value": 2
      },
      {
        "display_name": "Production",
        "value": 3
      }
    ],
    "label": "Product type",
    "read_only": false,
    "required": true,
    "type": "choice"
  },
  ...
}
```
